## CELLULAR AUTOMATA

Springer-Verlag GmbH Sep 2010, 2010. Taschenbuch. Condition: Neu. Neuware -  
This volume collects the papers selected for presentation at the 9th International Conference on Cellular Automata for Research and Industry (ACRI 2010), held in Ascoli Piceno (Italy), September 21-24, 2010. ACRI conferences have been offering since 1994 a biennial scientific meeting to both scientists and innovation managers in academia and industry to express and discuss their viewpoints on current and future trends, challenges, and state-of-the-art solutions to various problems in the fields of arts, biology, chemistry, communication, ecology, economy, engineering, networks, physics, social science, and traffic control. ACRI 2010 was organized by the Complex Systems and Artificial Intelligence (CSAI) research center of the University of Milano-Bicocca as a forum for the presentation and discussion of specialized results as well as general contributions to the growth of the cellular automata approach and its application. Cellular automata represent a very powerful approach to the study of spatio-temporal systems where complex phenomena are built up out of many simple local interactions. The ACRI conference series was first organized in Italy (ACRI 1994 in Rende, ACRI 1996 in Milan, and ACRI 1998 in Trieste), and after having moved to other European and international settings, this year came back to Italy: ACRI 2000 in Karlsruhe (Germany), ACRI 2002 in Geneva (Switzerland), ACRI 2004 in Amsterdam (The Netherlands), ACRI 2006 in Perpignan (France), and ACRI 2008 in Yokohama (Japan). In order to give a perspective in which both theoretical and applicational aspects of cellular automata contribute to the growth of the area, this book mirrors the structure of the conference, grouping the 74 papers into two main parts. 672 pp. Englisch.
