

Instant notes in zoonotic infections

By Selvakumar, Navaraj / Selvakumar, Jasmine

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | This book is targeted for medical and life science students. This would help the readers to become aware of the spread and control of infections transmitted from animals. Approximately 75% of recently emerging infectious diseases affecting humans is diseases of animal origin. Many factors like environmental changes, human and animal demography, pathogen changes and changes in farming practice lead to the emergence of zoonotic diseases. Social and cultural factors such as food habits and religious beliefs play a role in the emergence of zoonotic diseases. | Format: Paperback | Language/Sprache: english | 116 pp.

Reviews

Comprehensive guideline! Its such a good read through. It is actually written in basic words and not confusing. I am just easily could possibly get a enjoyment of reading a composed book.

-- **Lonzo Wilderman**

The best book i at any time read. I am quite late in start reading this one, but better then never. I realized this publication from my dad and i advised this book to understand.
