

Laser Surface Engineering

Filesize: 2.21 MB

Reviews

A fresh e book with a brand new point of view. It is definitely simplistic but surprises in the fifty percent of your ebook. Its been designed in an extremely basic way and is particularly just soon after i finished reading this ebook where in fact altered me, change the way i really believe.

(Dr. Alberta Schmidt V)

LASER SURFACE ENGINEERING

To save **Laser Surface Engineering** PDF, you should click the web link beneath and download the file or have accessibility to other information which are have conjunction with LASER SURFACE ENGINEERING book.

Book Condition: New. Publisher/Verlag: Woodhead Publishing | Processes and Applications | Lasers can alter the surface composition and properties of materials in a highly controllable way, which makes them efficient and cost-effective tools for surface engineering. This book provides an overview of the different techniques, the laser-material interactions and the advantages and disadvantages for different applications. Part one looks at laser heat treatment, part two covers laser additive manufacturing such as laser-enhanced electroplating, and part three discusses laser micromachining, structuring and surface modification. Chemical and biological applications of laser surface engineering are explored in part four, including ways to improve the surface corrosion properties of metals. Provides an overview of thermal surface treatments using lasers, including the treatment of steels, light metal alloys, polycrystalline silicon and technical ceramics Addresses the development of new metallic materials, innovations in laser cladding and direct metal deposition, and the fabrication of tuneable micro- and nano-scale surface structures Chapters also cover laser structuring, surface modification, and the chemical and biological applications of laser surface engineering | Part I - Thermal surface treatments using lasers 1 Structures, properties and development trends in laser surface treated hotworked steels, light metal alloys and polycrystalline silicon 2 Laser nitriding and carburization of materials 3 Mechanical properties improvement of metallic rolls by means of laser surface alloying 4 Laser surface treatment of AISI 304 steel with the presence of B4C particles at the surface 5 Characterization and modification of technical ceramics through laser surface engineering Part II - Laser additive manufacturing in surface treatment and engineering 6 Compositional modification of Ni-based alloys for laser-deposition technologies 7 New metallic materials development through laser additive manufacturing 8 Innovations in laser cladding and direct metal deposition 9 Laser-enhanced electroplating for generating micro- and nanoparticles with continuous-wave and pulsed Nd-YAG laser interactions 10 Laser...
