

Popular Astronomy Volume 15

Filesize: 8.01 MB

Reviews

*Thorough guideline! Its this type of good read. It is really simplistic but shocks from the 50 percent from the publication. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Sallie Wiegand)*

Their positions for 1900 are o S mag. 3.1907 Hercules 16 54 11f +21 42 00. 12.7--14.5 4.1907 VulpecuUe 19 00 08 +24 40 16 13.6--14.5 The changes of magnitude indicated occur in the intervals lh 06m and of l 17 respectively. GENERAL NOTES. Study and Observation of the Planets. In common with other publications like this, we have had little to say about the study and observation of the planets, not because there is little or nothing to say, but because many other things have claimed our attention too fully for time or space for this most interesting line of astronomical work. The fact that, for some time past, The Observatory (Knglishl has had a continued article from month to month, by the pen of an able writer on astronomical themes has brought this matter forcibly to mind and it is our purpose to supply for our readers something of this kind in the near future. Another thought about such matter is the possibility and even the probability that such a course, if rightly pursued, might stimulate observation of the planets and their satellites, in various ways, that would be useful to astronomy. There is plenty of opportunity for useful work in this delightful field. Great Solar Protuberance, Aug.: J0, 1905. We have chosen for our frontispiece, a copy of the reproduction of the original negative in the same size, of a great protuberance, seen on the east limb o! the...
