Building Motion in Wind: Proceedings of a Session Sponsored by the Aerodynamics Committee of the Aerospace Division and the Wind Effects Committee of the Structural Division of the American Society of Civil Engineers

By N. Isyumou, T. Tschanz

American Society of Civil Engineers. Hardback. Book Condition: new. BRAND NEW, Building Motion in Wind: Proceedings of a Session Sponsored by the Aerodynamics Committee of the Aerospace Division and the Wind Effects Committee of the Structural Division of the American Society of Civil Engineers in Conjunction with the ASCE Convention in Seattle, Washington, N. Isyumou, T. Tschanz, The trend towards higher structural efficiency and hence lower cost has resulted in a generation of lighter and more flexible buildings with a lower inherent capacity for energy dissipation or damping. Unfortunately, these trends have produced structures which are more sensitive to the dynamic action of wind. The emphasis in the design of modern tall buildings has therefore shifted to requirements to control building movements or "drift" and to limit wind induced accelerations. The first two papers in this book deal with the action of wind on two important tall buildings. In both cases, the designers relied on wind tunnel model tests for information on wind induced loads and building motions. The design of the Columbia Seafirst Center took advantage of economies possible as a result of wind tunnel studies. Viscoelastic dampers were added to the building, however, to limit its motion and...

Reviews

This publication is indeed gripping and exciting. I could comprehend almost everything using this composed e publication. I am easily could possibly get a delight of looking at a composed pdf.

-- Lynn Lindgren

Undoubtedly, this is the finest job by any article writer. it had been writtern very perfectly and beneficial. Its been printed in an exceedingly simple way in fact it is only following i finished reading this ebook by which basically modified me, modify the way in my opinion.
