

Concepts in Photobiology: Photosynthesis and Photomorphogenesis (Softcover reprint of the original 1st ed. 1999)

By G. S. Singhal, Gernot Renger, S. K. Sopory, K.D. Irrgang, Govindjee

Springer. Paperback. Book Condition: new. BRAND NEW, Concepts in Photobiology: Photosynthesis and Photomorphogenesis (Softcover reprint of the original 1st ed. 1999), G. S. Singhal, Gernot Renger, S. K. Sopory, K.D. Irrgang, Govindjee, Photobiology is an important area of biological research since a very large number of living processes are either dependent on or governed by light that we receive from the Sun. Among various subjects, photosynthesis is one of the most important, and thus a popular topic in both molecular and organismic biology, and one which has made a considerable impact throughout the world since almost all life on Earth depends upon it as a source of food, fuel and oxygen. However, for growth of plants, light is equally essential, and research on photomorphogenesis has revealed exciting new developments with the application of newer molecular biological approaches. The present book brings together and integrates various aspects of photosynthesis, biology of pigments, light regulation of chloroplast development, nuclear and chloroplast gene expression, light signal transduction, other photomorphogenetic processes and some photoecological aspects under one cover. The chapters cover biochemical and molecular discussions of most of the above topics in a comprehensive manner and include a wide range of 'hot topics' that...

Reviews

I just started out reading this ebook. It is rally exciting throgh reading through time. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Leonie Collins**

The very best publication i at any time study. It really is basic but shocks inside the fifty percent of the ebook. It is extremely difficult to leave it before concluding, once you begin to read the book.
