

## Hands-On Sencha Touch 2: A Real-World App Approach

By Lee Boonstra

O'Reilly Media, Inc, USA, United States, 2014. Paperback. Book Condition: New. 231 x 178 mm. Language: English . Brand New Book. Get hands-on experience building speedy mobile web apps with Sencha Touch 2.3, the user interface JavaScript framework built specifically for the mobile Web. With this book, you'll learn how to build a complete touch application, called Find a Cab, that has the look and feel of a native app on Android, iOS, Windows, and BlackBerry devices. In the process, you'll work with Sencha's model-view-controller (MVC) components for form handling, styling, integration with outside data, and other elements. The Sencha Touch learning curve can be steep, but if you're familiar with JavaScript, HTML5, CSS3, and JSON, this guide will get you up to speed through real-world examples. Learn the fundamentals, including the class and layout systems. Use the Sencha MVC architecture to structure your code. Implement data models and stores, and create an event controller. Make remote connections by implementing server proxies. Save data offline by implementing client proxies. Work with view components such as maps, lists, and floating panels. Implement and handle forms, and construct a custom theme. Create production and native build packages.
