Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from The Anatomy and Surgery of the Frontal Sinus and Anterior Ethmoidal Cells This opportunity is taken to express my great indebtedness to Professor Thomas Dwight, of Harvard University, not only for the unlimited privileges necessary to carry on this investigation, but also for many valuable suggestions. About 125 subjects, or 250 frontal sinuses, obtained from dissecting-room material, form the basis of this research. They were inspected when obtained, and preserved in alcohol for future study and reference. Fifty of these specimens were macerated, after examination, in the natural state, and about fifty more bony specimens have been accessible for study. The parts have been examined from sagittal, coronal, and horizontal sections, and also by dissection of especial regions, the use of probes, injection of fluids, etc. The accompanying plates were made from photographs taken by Bernard W. Trafford, Esq., of Boston, whose assistance and skill were invaluable in adding to the success of the work. These photographs were taken from specimens selected as seemed necessary to demonstrate the anatomy under consideration, hence the relations are an exact reproduction. The size of the specimen reproduced in the plate is not altered, except in a few obvious instances. The aim of the anatomical portion of this paper is not to describe accurately and completely any one or more bones, but only the necessary portion of any bone entering into the topography of the region to be considered. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format...
