## SCREENING FOR NATURAL PRODUCTS FROM ACTINOBACTERIA

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Actinobacteria are of special biotechnological interest since they are known to produce chemically diverse compounds with a wide range of biological activity. Most actinobacteria species have the capability to synthesize many different biologically active secondary metabolites such as antibiotics, herbicides, pesticides, anti-parasitic and enzyme inhibitors. Actinobacteria isolated from Egyptian habitats proved their abilities for production of natural products. The most active metabolites produced were antibiotic and antileukemia production. Presence of Polyketide Synthase Genes proved to be a good marker for bioactive producing compounds by actinobacterial isolates. | Format: Paperback | Language/Sprache: english | 345 gr | 220x150x13 mm | 248 pp.
