

New Horizons in Occultation Research: Studies in Atmosphere and Climate (Paperback)

By -

Springer-Verlag Berlin and Heidelberg GmbH Co. KG, Germany, 2014. Paperback. Condition: New. 2009 ed.. Language: English . Brand New Book ***** Print on Demand *****.Building on its heritage in planetary science, remote sensing of the Earth's atmosphere and ionosphere with occultation methods has undergone remarkable developments since the first GPS/Met proof of concept mission in 1995. Signals of Global Navigation Satellite Systems (GNSS) satellites are exploited by radio occultation while natural signal sources are used in solar, lunar, and stellar occultations. A range of atmospheric variables is provided reaching from fundamental atmospheric parameters such as density, pressure, and temperature to water vapor, ozone, and other trace gas species. The utility for atmosphere and climate arises from the unique properties of self-calibration, high accuracy and vertical resolution, global coverage, and (if using radio signals) all-weather capability. Occultations have become a valuable data source for atmospheric physics and chemistry, operational meteorology, climate research as well as for space weather and planetary science. The 3rd International Workshop on Occultations for Probing Atmosphere and Climate (OPAC-3) was held September 17-21, 2007, in Graz, Austria. OPAC-3 aimed at providing a casual forum and stimulating atmosphere for scientific discussion, co-operation initiatives, and mutual learning and support amongst members of all different occultation communities. The workshop was attended by 40 participants...

Reviews

Completely essential read through publication. It normally does not expense excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Morris Cruickshank**

This book is really gripping and fascinating. I really could comprehend almost everything using this published e book. I am just very easily can get a delight of reading a published publication.
