## CREATURES OF THE NIGHT (PAPERBACK)

FIREFLY BOOKS, 2014. Paperback. Condition: New. Language: English . Brand New Book. A spectacular collection of animals who are at home in the dark. Creatures of the Night features more than a dozen extraordinary animals that live in the dark. These are mammals, birds, insects and spiders whose unique physical features help them to survive in the pitch-black darkness of jungles, fields and in the air. The animals featured include: Aye-aye -- A lifetime spent in rain forest trees where they curl up to sleep during the day Common Glow-worm -- Bioluminescent beetle that doesn't look like a beetle Fungi -- More closely related to animals than plants, fungi expand (rather than grow) over a damp night Kinkajou -- Night-roaming cousin of raccoons Mexican Red-kneed Tarantula -- Hunts at night, capturing insects, frogs, lizards and mice Net-casting spider -- A huge pair of forward-facing eyes help it to see at night Railroad worm -- The only animal that is naturally bioluminescent in the red spectrum Vampire bat -- Day-sleepers that hunt during the darkest part of the night. Intricately drawn artworks give accurate details of each animal's anatomy and behavior, and stunning photographs show how each animal hunts.
