

ECR Etching of II-VI Compound Semiconductors

Filesize: 3.68 MB

Reviews

This book is worth getting. Yes, it really is enjoy, continue to an amazing and interesting literature. You can expect to like how the author publish this book.
(Prof. Cindy Paucek I)

ECR ETCHING OF II-VI COMPOUND SEMICONDUCTORS

To read **ECR Etching of II-VI Compound Semiconductors** PDF, you should click the link below and download the ebook or have access to other information that are in conjunction with ECR ETCHING OF II-VI COMPOUND SEMICONDUCTORS ebook.

Condition: New. Publisher/Verlag: Scholar's Press | Surface studies by spectroscopic analysis | The dry etching of II-VI compounds is important for the device processing as it has higher degree of etch selectivity and anisotropy. Different techniques for plasma generation have been discussed. Set up of ECR system with various components and the generation of ECR plasma has been described. The book consists of ECR etching of III-V and II-VI group compound materials. The etching experiments were carried out by changing the various parameters like temperature, etching time, flow rate, microwave power and RF power. UV-Vis spectroscopic study of the etched samples has been made which is discussed in detail. ECR etching of cadmium zinc telluride, one of the II-VI compound materials has been performed by using gas mixture of CCl_2F_2 and Ar. The CCl_2F_2 gas is chosen for the etching purposes because of its less toxicity in comparison to pure Cl and other Cl based gases. Structural, thermal and optical properties of II-VI compounds and their various applications have also been discussed. In one chapter the optical properties of the amorphous films have been investigated when the films have been exposed to the ECR discharge. | Format: Paperback | Language/Sprache: english | 124 pp.
