ARCHITECTING THE INTERNET OF THINGS

Condition: New. Publisher/Verlag: Springer, Berlin | The authors of this book provide a research perspective on current and future developments in the Internet of Things. The chapters cover a range of topics from system design aspects and core architectural approaches to end-user participation and applications. | Many of the initial developments towards the Internet of Things have focused on the combination of Auto-ID and networked infrastructures in business-to-business logistics and product lifecycle applications. However, the Internet of Things is more...
