Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: .from each class. The progeny of the two ears were examined separately, but no significant differences were found, so the progeny are tabulated together. ht. .: :: v. 1 ; f, !(. ! v-;j: --; /:: :;.! vij .o? . COLORED X COLORED. As the result of crossing plants grown from the colored horny seeds with the plants grown from the colored waxy seeds of ears Nos. 1110 and 1134, 24 ears were obtained (Table XXV). The crosses were made using the waxy plants as both male and female parents, but as no significant differences were found the endosperm textures may be disregarded. Five all-colored ears were obtained that are not tabulated. The 25 ears tabulated were borne on 23 plants. , The expected proportions for these 28 individual plants is 15.75 plants all colored, 10.5 plants with a monohybrid ratio, and 1.75 plants with a dihybrid ratio. The observed plants fell into two groups only, 5 ears all colored and 23 with a monohybrid ratio. The deviation, though too large to be ascribed to chance, may, nevertheless, be the result of accident. The observed deviation would be expected to occur as the result of chance but once in 500 times. Although this deviation would seem significant, it is, in fact, merely accidental. Self-pollinating these plants proved that they were in the expected proportion of 1 homozygous for both color factors, 2 heterozygous for one and homozygous for the other, and 1 heterozj gous for both...
