RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 86 pages. OCLC Number: (OCoLC)48128146 Subject: Forest products -- United States. Excerpt: . . . as reducing pressure to disturb natural forests. Conversion of natural forests to plantations, however, may adversely impact the environment owing to loss of biological diversity and habitat for native species. In addition, plantation management, including pesticide and fertilizer use, could impact water quality and aquatic habitats. The ATL is likely to result in positive environmental changes by reducing timber harvest in some countries. It also may lead to positive environmental changes if it stimulates increases in manufacturing efficiency in export-oriented developing countries. In addition, the overall ATL initiative (of which forest products is but one of eight sectors) may contribute to increasing income and rising standards of living in developing countries. 3 Increases in income contribute to decreases in consumption of fuelwood and increases in consumption of other wood products as well as greater interest in the ecological functions of forests. There is uncertainty associated with estimates of the effects of the ATL on forest products trade. Important sources of this uncertainty are the difficulty in determining base-line conditions against which...
