

Food Plant Engineering Systems (Paperback)

By Theunis Christoffel Robberts

Taylor Francis Ltd, United Kingdom, 2016. Paperback. Condition: New. 2nd Revised edition. Language: English . Brand New Book. The component parts of a manufacturing system are important. Without peripherals and services such as pumps, boilers, power transmission, water treatment, waste disposal, and efficient lighting, the system will collapse. Food Plant Engineering Systems, Second Edition fills the need for a reference dealing with the bits and pieces that keep systems running, and also with how the peripheral parts of a processing plant fit within the bigger picture. The author has gathered information from diverse sources to introduce readers to the ancillary equipment used in processing industries, including production line components and environmental control systems. He explores the buildings and facilities as well as the way various parts of a plant interact to increase plant production. This new edition covers the systems approach to Lean manufacturing, introducing Lean principles to the food industry. It also addresses sustainability and environmental issues, which were not covered in the first edition. Written so readers with only basic mathematical knowledge will benefit from the content, the text describes measurements and numbers as well as general calculations, including mass and energy balances. It addresses the properties of...
