INVESTIGATING MULTICOLLINEARITY IN THE ENVIRONMENT AND HEALTH STUDY

Investigating
Multicollinearity in the
Environment and Health
Study

LAMBERT
ACADEMIC PUBLISHING

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Human biomonitoring is the measurement of chemicals in blood, urine, and other tissues or fluids. It is becoming a common tool in the study of human exposure to environmental pollution and the potential health effects of those pollutions. This work reveals the correlation between the measured markers of internal exposure and techniques to deal with them. A number of diagnostics tests used to determine the degree to which multicollinearity might exist includes...
