Thk many advantages resulting from the use of Steam vessels are too firmly established, and too generally acknowledged, to require any remarks from me upon the subject. It is, however, admitted, that improved modes in their construction may render them more calculated for distant voyages, as well as enable them better to resist the effects of tempests upon our own shores during the winter season. Some general rules for the guidance of Steam vessels may contribute also to advance this system of navigation. The statements herein after given, founded upon facts of universal notoriety, prove, that Steam Navigation (even though no general means were adopted, beyond those now existing, to prevent casualties at sea) is not so dangerous as the old method of sailing; and that it is next to impossible for a fatality to occur if the plans herein laid down be observed. The facility of Steam Vessels in avoiding a lee shore, the certainty of gaining a weather one, and of making a harbour in the event of being overtaken by a storm, make the advantages ten to one in their favour. The following paragraph from the Dublin Morning Post, serves to shew, that His Majesty, the Patron of Arts and Sciences, was convinced of the safety as well as facility of this mode of conveyance, when on his late visit to Ireland, he quitted his yacht and squadron, which did not reach Dublin Bay for many hours after...
