By Ron Newby

Ron Newby, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This critique is written for the lay public interested in our evolutionary path, our brain, our traits and behaviors that led us to be the last Hominin standing. Topics include human s creative and cooperative nature as well as the topics of, Politics, Religion, Over-population, disparity of wealth, the Climate Crisis and man s own inherited biological traits. These later topics are discussed as causative agents to our possible demise. Presented with scientific information, personal anecdotes, wit and conjunctures, it is the point of view of a scientist and artist, a humanist, one who has considered human s origin s clues to our behavior. This book argues that a liberal agenda is preferable for the continuance of the human species.
