

Converging World: Connecting Communities in Global Change

By John Pontin, Ian Roderick

GREEN BOOKS, United Kingdom, 2007. Paperback. Book Condition: New. 204 x 146 mm. Language: English . Brand New Book. The principle of contraction and convergence can be applied to climate change, showing us a way forward by reducing the ecological footprint of some while increasing that of others. Such convergence has many dimensions: technological change, cultural diversity, human rights and political power. This Briefing explores these ideas and describes how a charity put these ideas into action. Inspired by the work of Social Change and Development (SCAD) in India, the charity has directly reduced carbon emissions by erecting wind turbines in India, funded by individuals and businesses with high emissions elsewhere in the world in return for an allocation of the carbon saved. The Converging World is an action story which tackles the complexities of climate change, environmental degradation and social injustice.

Reviews

Most of these ebook is the best publication available. It is definitely simplistic but unexpected situations within the 50 percent of the book. You will not sense monotony at any moment of the time (that's what catalogs are for relating to in the event you request me).
