The Centers for Medicare and Medicaid Services (CMS) currently offers to Medicare providers and Medicare Administrative Contractors the use of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) Eligibility Transaction System (HETS) in a real-time data processing environment. HETS is operational 24 hours a day, 7 days a week, except during regularly scheduled maintenance Monday mornings, from midnight until 5:00 a. m. , and when CMS announces other maintenance periods during one or two weekends each month. According to program officials, 244 entities were using HETS in 2012, including about 130 providers, 104 clearinghouses that provide data exchange services to about 400,000 health care providers, and 10 Medicare contractors that help CMS process claims for services. From January through June 2012, HETS processed each month an average of 1.7 million to 2.2 million queries per day with most of the queries submitted between the hours of 8:00 a. m. and 4:00 p. m. eastern time. The users with whom we spoke confirmed that operational problems they experienced with the system in 2010 and the first few months of 2011 were resolved in spring 2011 after CMS implemented several hardware and software replacements and upgrades. System performance reports for the first 6 months of 2012 showed that the average response time per transaction was less than 3 seconds. Users described experiences with the system that were consistent with these data. They told us that they are currently satisfied with the operational status of HETS and that the system provides more complete information and reliable service than other systems that they use to verify eligibility with commercial health insurers.
