GIS Based Identification of
Groundwater Recharging
Potential Zones
Application of multi-criteria decision-making
technique

LAP Lambert Academic Publishing, 2017. Paperback. Condition: New. Aufl.. Language: English . Brand New Book. The groundwater (GW) constitutes one part of the earth's water circulatory system. GW is attracting an ever-increasing interest due to the scarcity of good quality subsurface water and growing need of water for domestic, agricultural, and industrial uses. The concept of integrated Remote sensing and GIS has proved to be an effective tool for integrating watershed management and GW recharging. The problem of the...

Reviews

Very beneficial to any or all class of individuals. It is rally interesting throug looking at time. You will not feel monotony at at any time of your time (that's what catalogs are for concerning in the event you question me).

-- **Dr. Dallas Reinger IV**

This publication may be worth purchasing. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Cassandra Von**
