Not illustrated. 1904 Excerpt: .on such dwarf-shoots elongate little, if at all, more than do those between the bud-scales which covered them the previous year. In many trees these dwarf-shoots go on giving rise to further dwarf-shoots year after year, each season s growth in length being little, if any, greater than that of the whole bud; consequently the entire length of a dwarf-shoot may be closely ringed by alternating series of crowded scale-scars and equally crowded leaf-scars, and the leaves on such shoots appear to be tufted. Considering how different these dwarf-shoots, or short twigs, are from the ordinary long twigs, it will be understood how profoundly they may affect the branching, and this the more in that they frequently bear, or terminate in flowers. They can, however, suddenly change their usual habit; and after growing slowly for many years, a dwarfshoot, which has only attained a length of...
