Reviews

These kinds of book is every thing and helped me hunting forward plus more. It is probably the most remarkable book we have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.

The Ferracute people use in their drawing-room large triangles having cut in them some outlines which they have to reproduce often in their rough sketches--as for instance, the heads of hex bolts, the conventional representation of screw-threads, etc. Holding Large Drawings on the Board. Since going through the Pennsylvania Railway shops at Altoona, a number of years ago, I have given up the old barbarism of holding large drawings on the board by glue or by drafting-tacks, and have used small copper tacks (about the one-ounce size) as being cheaper and more convenient to insert and take out, and as offering no obstruction to the passage of the T square and the triangle; besides which they have not the habit, as some have, of coming up into one s thumb (whence the name of thumb-tacks I suppose) on being pressed into a hard board. But in the Brown Sharpe drawing-rooms, where I knew that they had also been using for some time the ordinary copper tacks, I saw something which they say is better yet, and which for many things is supplanting the copper tack. They use small slips of gummed paper about three-fourths of an inch or an inch long and one-fourth of an inch wide, (probably suggested by the short strips on the edge of a sheet of postage-stamps, when one is lucky enough to get stamps with some stick em on them) and these maKe as firm a connection as is desired...
