Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: .several years; then, had they been painted with good stuff before rust appeared, and had this treatment been continued at regular intervals, we think that malleable iron would be in favour at Bradford still, for our own experience is that malleable iron is eminently satisfactory in manufacturing districts which must be similar to Bradford. After all, one does not have to use gun metal for poles, bases, collars, bracket arms, and flexible-suspension brackets because we cannot keep the steel or the cast iron rust free; why, then, should it be necessary for hangers? In the matter of local action, we can assure Mr. Blackburn that we have met with nothing but the exact opposite of his experience, and we even hesitated to exhibit specimens of decayed span wire because we felt that every one would take the action for granted. What prevents it at Bradford Mr. Blackburn must tell us, for we cannot suggest a reason. In the district bordering on Birmingham 7/12 and 7/11 span wire supporting bronze hangers requires renewal at the end of four to five years, because several strands are completely eaten away by that time, and the remainder weakened by local action between the steel and bronze, but 7/15 wire with malleable iron hangers attached has not been renewed yet, and looks good for many years longer. On the point of failure of insulated bolts by what Mr. Blackburn calls oxidation, but we prefer to attribute to electrolysis, there is little..
