Human Spaceflight (Hardback)

By Jr. Joseph A. Angelo

Facts on File Inc, United States, 2007. Hardback. Condition: New. Language: English . Brand New Book. Human Spaceflight explores the epoch journeys of human beings as they first ventured beyond Earth's atmosphere, starting in the early 1960s, and traveled into outer space. One of the most memorable of these daring missions occurred on July 20, 1969, when American astronaut Neil Armstrong became the first human to walk on another world. This volume follows the evolution of space technology from the dawn of the Space Age to the present day, addressing such topics as human survival in space, a spacecraft's ability to launch people into orbit, and the safety and dangers of spaceflight. A number of historic events, scientific principles, and technical breakthroughs were vital to establishing a human presence in space, and Human Spaceflight examines some of these scientific milestones more closely. This volume also presents some exciting future human spaceflight activities, including a return to the Moon to establish permanent lunar surface bases, human expeditions to Mars, and even the creation of large space settlements in orbit around Earth and at other strategic locations throughout the solar system. A special collection of illustrations highlighting historic, contemporary, and...
