

Inorganic Chemistry (2nd edition pharmacy nationwide class of higher college education planning materials)

Filesize: 8.45 MB

Reviews

This is basically the finest publication i actually have go through till now. We have read and i also am confident that i am going to likely to read through again once more in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Prof. Adell Lubowitz)

INORGANIC CHEMISTRY (2ND EDITION PHARMACY NATIONWIDE CLASS OF HIGHER COLLEGE EDUCATION PLANNING MATERIALS)

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 259 Publisher: Chinese Medical Science and Technology Pub. Date :2010-01-01 version 2 2010-01-01 2nd printing. The book includes the elements of inorganic chemistry and properties of two compounds . a total of 13. Book focus on teaching the theory of solution. the rate and extent of chemical reactions. atomic structure and molecular structure and acid-base balance. precipitation dissolution equilibrium. redox balance. coordination and balance the basic principles of inorganic chemistry; for a strong theoretical content. teaching materials make the appropriate treatment to students should be able to understand and solve practical problems for the rejection of the principle of knowledge. Contents: Section I Chapter solution dispersion system the concentration of a solution II. solution concentration. said second method for calculating the concentration of dilute solution of the third quarter according to the number of one drop of the vapor pressure of the solution. the solution boiling point rise third year. the solution freezing point lower four. the solution osmotic pressure colloid solution and the surface of the second chapter the phenomenon of Section sol. sol of the nature of the two. the stability of the sol polymer solution and coagulation Section A polymer The concept of two. the formation of polymer solution and characteristics of three polymer solution on the sol-gel a protective effect of the third quarter. the formation of two gel. the gel material of the main characteristics of the fourth quarter a surface phenomenon. surface tension with two surface energy. surface adsorption of three surfactants Chapter chemical reaction dynamics of chemical reaction rates one section. the chemical reaction rate and the representation of two. the activation energy three factors affecting the rate of chemical...
