Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Notes on the Flora of Middle Georgia Athens, the county-seat of Clarke County, is situated in that section of the state known as Middle Georgia, a region well defined geologically from the two newer sections, north and south Georgia. Middle Georgia occupies about one third of the area of the state, and is distinguished by its geological formation being wholly Archaean or metamorphic. My botanical explorations of this region, in the spring and fall of 1895 and 1896, and the Spring of 1897, were confined mainly to the western half of Clarke County, and portions of the neighboring counties of Jackson, Oconee, Walton and Morgan. This territory which I explored lies in the lower foothills of the Blue Ridge, being entirely south of latitude 34n., and east of longitude 83 31 W., and ranging from 500 to 800 feet above sea-level. Taking Clarke County as typical of the surrounding region, its characteristic features of soil, topography, etc., may be briefly described. The predominating soil consists largely of red clay, derived from the disintegration of the granitic rocks which underlie the surface everywhere in this region and outcrop in many places. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
