By Michael G. LaFosse, Richard L. Alexander

Tuttle Publishing, Japan, 2015. Hardback. Condition: New. Book and Kit with DVD ed.. Language: English . Brand New Book. Geometric origami models made from multiple coloured paper sheets folded and fitted together have exploded onto the origami scene and become enormously popular. Just when you think everything has been seen and done before-these new and exciting paper craft designs pop up! The appealing modular models in this kit are all new and designed by world renowned origami artist Michael LaFosse. Because these designs each require multiple sheets of paper, and the folding required for each element is relatively simple, these are perfect activities to share with a child. The magic of these origami models is in fitting the pieces together, often using ingenious but simple locks. The same elements can often be reused over and over to create new geometric shapes-which is a great way of demonstrating to kids the wonders of geometry.
