THE CASE AGAINST FLUORIDE: HOW HAZARDOUS WASTE ENDED UP IN OUR DRINKING WATER AND THE BAD SCIENCE AND POWERFUL POLITICS THAT KEEP IT THERE

[DOWNLOAD PDF](#)

Chelsea Green Publishing. Paperback. Book Condition: New. Paperback. 392 pages. Dimensions: 8.8in. x 6.0in. x 1.1in. When the U. S. Public Health Service endorsed water fluoridation in 1950, there was little evidence of its safety. Now, six decades later and after most countries have rejected the practice, more than 70 percent of Americans, as well as 200 million people worldwide, are drinking fluoridated water. The Center for Disease Control and the American Dental Association continue to promote it--and even mandatory statewide water fluoridation--despite increasing evidence that it is not only unnecessary, but potentially hazardous to human health. In this timely and important book, Dr. Paul Connett, Dr. James Beck, and Dr. H. Spedding Micklem take a new look at the science behind water fluoridation and argue that just because the dental and medical establishments endorse a public health measure doesn't mean it's safe. In the case of water fluoridation, the chemicals that go into the drinking water that more than 180 million people drink each day are not even pharmaceutical grade, but rather a hazardous waste product of the phosphate fertilizer industry. It is illegal to dump this waste into the sea or local surface water, and yet it is allowed in our drinking water. To make matters worse, this program receives no oversight from the Food and Drug Administration, and the Environmental Protection Agency takes no responsibility for the practice. And from an ethical standpoint, say the authors, water fluoridation is a bad medical practice: individuals are being forced to take medication without their informed consent, there is no control over the dose, and no monitoring of possible side effects. At once painstakingly documented and also highly readable, *The Case Against Fluoride* brings new research to light, including links between fluoride and harm to the brain, bones, and endocrine system,...
