

L Emergence de La Presse Mathematique En Europe Au 19eme Siecle

Filesize: 8.91 MB

Reviews

The publication is simple in go through preferable to fully grasp. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Mrs. Josiane Collins)

L EMERGENCE DE LA PRESSE MATHEMATIQUE EN EUROPE AU 19EME SIECLE

[DOWNLOAD](#)

College Publications, United States, 2014. Paperback. Book Condition: New. 234 x 156 mm. Language: French . Brand New Book ***** Print on Demand *****.Cet opus de la collection Cahiers de Logique et d Epistemologie est une contribution a l histoire de la presse mathematique et plus particulierement des journaux qui marquerent ou accompagnerent son emergence dans l Europe du 19eme siecle. Bien que traitant de ce sujet sur un plan general, il est plus particulierement question ici de periodiques ayant vu le jour dans quatre pays europeens sur la periode 1800-1900: la France, l Italie, le Portugal et l Espagne. Le lecteur y trouvera des contributions originales sur leurs editeurs, leurs politiques editoriales, leurs contenus et les populations d auteurs qui les alimenterent. On verifiera ainsi comment l emergence de ces journaux contribua a la specialisation des mathematiques, a l instauration de la forme moderne des echanges et de l emulation entre mathematiens et indirectement a la mise en place des criteres actuels de la reconnaissance de ces derniers par leurs pairs. This opus of the series Cahiers de Logique et d Epistemologie is a contribution to the general history of mathematics press and especially of some journals that allowed or accompanied its birth in some European countries in the 19th century: France, Italy, Portugal and Spain. The reader will find in it original papers on their editors, their editorial policies, their contents and their authors. So one can check how the emergence of these journals contributed to the specialization of mathematics, to the introduction of the modern form of exchanges and competition between mathematicians, and indirectly to the implementation of current criteria for the recognition of those ones by their peers. Christian Gerini and Norbert Verdier are professors in Mathematics and researchers in History and Philosophy of Science, the...
