DYE DECOLOURIZATION POTENTIAL OF DYE RESISTANT MICROBES

Dye Decolourization
Potential of Dye Resistant
Microbes

LAP Lambert Academic Publishing Mrz 2015, 2015. Taschenbuch. Condition: Neu. Neuware - Textile-processing wastewaters, typically with higher content of dye which usually shows highly colored water and discharge in open water bodies, presents an aesthetic problem. As dyes are designed it is chemically and photolytically stable, they are highly persistent in natural environments. The release of dyes may therefore present an eco toxic hazard and introduces the potential danger of bio accumulation that may be transport through the food chain....
