

# Bio-Inspired Nanomaterials Nanotechnology (Hardback)

Ву-

Nova Science Publishers Inc, United States, 2010. Hardback. Condition: New. UK ed.. Language: English . Brand New Book. Nanoscience is a rapidly evolving field of studying and working with matter on an ultra-small scale, which was invented late in the twentieth century. Learning from biosystems in nature, scientists began to design experiments to specifically couple biology with nanofabricated materials, devices and tools. Such bio-inspired nanoscience utilizes biological processes, shape, chemical and physical functionality of biomolecules for atom-levelly controllable fabrication of advanced materials with extreme precision. This book presents the current knowledge and understanding of bio-inspired nanoscience by a collection of eleven impressive chapters, covering several remarkable aspects. This book will also provide researchers in these fields with the newest developments in this rapidly evolving field for advancing research.
