PERI-IMPLANT DISEASES

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Oral rehabilitation using implant-supported prostheses was a major breakthrough in dentistry. Dental implants (DI) survival rates exceed 91.5% in healthy patients. However, it may present complications of biological, mechanical and aesthetic nature. Biological failures occur due to inability of host tissues either to establish osseointegration (primary or early failures) or to maintain it (secondary or late failures). Late biological failures occur after osseointegration due off marginal infection (peri-implantitis), biomechanical overload or a...
