Excerpt from **Advanced Metal-Work, Vol. 1 of 3: Lessons on the Speed-Lathe, Engine-Lathe, and Planing-Machine; For the Use of Technical Schools, Manual-Training Schools, and Amateurs; The Speed-Lathe** While these lessons are not intended to dis pense with the watchful eye and the helpful hand of an instructor, they are designed to fu1nish to the student such explicit directions that he shall be able, in most cases, to do the work well if he will follow the directions exactly. The authors believe that the mechanical skill alone which a course of manual training imparts is only a part, and not even the most valuable part, of the train: ing which the workshop and laboratory can give: the power of intelligent reading and of accurate and orderly description is equally important, and so is the power of foreseeing the difficulties that will arise in the course of a given operation and of devising means to evade or overcome them. These powers it is hoped that these lessons may help to impart. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
