FIBRE OPTIC COMMUNICATION : KEY DEVICES

Springer-Verlag Gmbh Feb 2017, 2017. Buch. Condition: Neu. Neuware - The book gives an in-depth description of key devices of current and next generation fibre optic communication networks. Devices treated include semiconductor lasers, optical amplifiers, modulators, wavelength filters and other passives, detectors, all-optical switches, but relevant properties of optical fibres and network aspects are included as well. The presentations include the physical principles underlying the various devices, technologies used for their realization, typical performance characteristics and limitations, but development trends...
