Reviews

This book may be worth purchasing. It typically fails to expense excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Ken Watsica)

UP FOR GRABS: THE FUTURE OF THE INTERNET I

Cambria Press. Hardcover. Condition: New. 436 pages. Dimensions: 9.0in. x 6.1in. x 1.3in. Up for Grabs: The Future of the Internet, Volume 1 is the first volume of an exciting series by the Pew Internet and American Life Project and Elon University. How will the Internet be expected to change the workplace, family life, education and many other foundations of society between 2004 and 2014 Significantly. That was the forecast of nearly 1, 300 leading technology experts and scholars who responded to The Future of the Internet I, a 2004 survey by researchers at the Pew Internet and American Life Project and Elon University. The extensive elaborations supplied by survey respondents provide a vision of a networked, digital future that enhances many peoples lives but also has some distressing implications. The big-picture Internet issues of the next decade, as foreseen by the experts in this survey, include: positive and negative changes in the family dynamic; a conflict between our desire for privacy, security and ownership of intellectual property and our desire for the convenience of free information sharing on networked devices; and a concern over being inundated with information. About the series: Technology builders, entrepreneurs, consultants, academicians, and futurists from around the world share their wisdom in The Future of the Internet surveys conducted by the Pew Internet and American Life Project and Elon University. The series of surveys garners smart, detailed assessments of multi-layered issues from a variety of voices, ranging from the scientists and engineers who created the first Internet architecture a decade ago to social commentators to technology leaders in corporations, media, government, and higher education. Among the respondents are people affiliated with many of the worlds top organizations, including IBM, AOL, Microsoft, Intel, ICANN, the Internet Society, Google, W3C, Internet2, and Oracle; Harvard, MIT, and Yale; and...
