

The New York Architect Volume . 6

By Donn Barber

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: . as well as the distribution of intensity or loudness of the sound, with particular reference to waveinterference phenomena. Reverberation, of which echo may be considered a special case, is produced by the multiple reflections of a sound wave from one surface to another, causing prolongation and consequent overlapping of two successive sounds, with resultant blurring of speech and music. The laws governing this condition have been worked out and tested both in the laboratory and in practical application with unflinching success, and with remarkable agreement between theoretical and actual conditions. The other phase of the subject so far to be attacked is that of sound distribution. If a note of steady pitch is sounded in a room with reflecting surfaces, a stationary wave system is set up with well defined points of maximum and minimum loudness, which differ in position with the pitch. Since a...
