

## The Monthly Microscopical Journal, Vol. 15: Transactions of the Royal Microscopical Society, and Record of Historical Research at Home and Abroad (Classic Reprint)

By Henry Lawson

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from The Monthly Microscopical Journal, Vol. 15: Transactions of the Royal Microscopical Society, and Record of Historical Research at Home and Abroad In the case of Dionaea, Darwin gives a very brief description of minute glands of a reddish-purple colour which cover the upper side of the leaf, and which he states to have the power of absorption. But in order to find an adequate description of these bodies we must go back nearly thirty years, when Dr. Lindley gave accurate descriptions and figures of them in his Ladies Botany, published in 1834, and, in the following words, showed a wonderful insight into their probable function: - From the cuticle of the upper surface of the leaf of Dionaea there spring at short intervals little red glands, which grow from minute green oval spaces, composed of two parallel green cells and resembling stomates. They are firm fleshy bodies resembling little convex buttons, and are composed of cells arranged in a circular manner round an axis consisting of two such cells stationed one on the top of the...
