Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Clinical Pathology of the Blood of Domesticated Animals That the examination of the blood has not been more generally used by veterinarians is partly due to the lack of accessible data concerning the blood of animals. There is a real need of a text book that will place this material within the reach of practitioners and students. It is true that but few data have been collected concerning the blood of animals compared with the amount known regarding the blood of man. Some work has, however, been done and the results obtained are of more value than their mere amount would indicate, because from the studies made of the condition of the blood in diseased animals we have learned that similar pathological processes produce, in general, changes in the blood similar to those produced by such processes in man. So the rich results obtained in human practice are made available to the veterinary practitioner. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
