

## Evaluating Health Interventions

By Øvretveit

Open University Press. Paperback. Condition: New. 324 pages. Dimensions: 9.3in. x 6.8in. x 1.0in. The questions are no longer whether to use or make an evaluation, but how well we use one or carry one out. As both volume and skills in healthcare increase, there is a parallel increase in the need to evaluate the outcomes and the effects of services rendered. In this book John Øvretveit furnishes us with timely, thoughtful and thorough guidelines for evaluation methods applied to health services. - Gudmund Hernes, Minister of Health, Norway. A basic textbook which describes the range of approaches to evaluation in healthcare and policymaking, and challenges some of the assumptions of the evidence based healthcare movement. For health practitioners, managers and policy advisers who need to use or carry out an evaluation, but who may be confused by the variety of approaches and about what we mean by evidence. The book is also useful to researchers who need to know about the strengths and weaknesses of different types of evaluation and about the practice and politics of evaluation. It describes principles, concepts and methods for evaluating health treatments, services, policies and organizational interventions. The strength of this book is its even-handed...
