STATISTICS: THE ART AND SCIENCE OF LEARNING FROM DATA PLUS MYSTATLAB WITH PEARSON ETEXT, GLOBAL EDITION (MIXED MEDIA PRODUCT)**DOWNLOAD**

Pearson Education Limited, United Kingdom, 2017. Mixed media product. Condition: New. 4th edition. Language: N/A. Brand New Book. For courses in introductory statistics. This package includes MyStatLab (TM). The Art and Science of Learning from Data Statistics: The Art and Science of Learning from Data, Fourth Edition, takes a conceptual approach, helping students understand what statistics is about and learning the right questions to ask when analyzing data, rather than just memorizing procedures. This book takes the ideas that have turned statistics into a central science in modern life and makes them accessible, without compromising the necessary rigor. Students will enjoy reading this book, and will stay engaged with its wide variety of real-world data in the examples and exercises. The authors believe that it is important for students to learn and analyze both quantitative and categorical data. As a result, the text pays greater attention to the analysis of proportions than many other introductory statistics texts. Concepts are introduced first with categorical data, and then with quantitative data. This package includes MyStatLab, an online homework, tutorial, and assessment program designed to work with this text to personalize learning and improve results. With a wide range of interactive, engaging, and assignable activities, students are encouraged to actively learn and retain tough course concepts. MyStatLab should only be purchased when required by an instructor. Please be sure you have the correct ISBN and Course ID. Instructors, contact your Pearson representative for more information.
