First and foremost it makes sense to illustrate the definition of the term drug as such. Moreover, opium is addressed specifically and its production, mode of action and pharmacological application as well as its effect on the human body will be explained briefly. Originally the pharmacological term drug described a substance of plant or animal origin. Another classification of the term refers on the one hand to the medicinal drug and on the other hand to the narcotic drug. The term medicinal drug means dried medicinal plants or parts of these plants, as for example roots, seeds or essential oils. The formulations of these plants or plant parts (or extracts of active substances) are therefore...
