TENTH REPORT OF THE DIRECTOR, NATIONAL HEART, LUNG, AND BLOOD INSTITUTE; TEN-YEAR REVIEW AND FIVE-YEAR PLAN, VOL. 3: LUNG DISEASES (CLASSIC REPRINT) (PAPERBACK)**DOWNLOAD PDF**

Forgotten Books, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Tenth Report of the Director, National Heart, Lung, and Blood Institute; Ten-Year Review and Five-Year Plan, Vol. 3: Lung Diseases Diseases of the lungs are among the leading causes of sickness and death in the United States. Bronchitis, asthma, and respiratory infections are among the common causes of absence from work; and because of their prevalence, chronic lung diseases, typified by emphysema, chronic bronchitis, asthma, and some occupational disorders, impose severe strains on the welfare and economy of the United States. In addition, pneumonia and pulmonary edema are frequent causes of death of patients with a wide variety of diseases that originate in organs other than the lungs. During the past decade, important strides have been made in preventing and coping with some of these disorders. In the eight sections of the report that follows, these accomplishments are described in detail. An overview of some of the important advances is presented here. For convenience, they are presented in five categories: basic research, diagnosis, prevention, management, and research training.
