

Blind Spots: The Failure of Contemporary Medicine to Recognise * an Epidemic of Energy Loss and ** Underlying Environmental Disruption (Paperback)

By Henrik Isager MD PhD

AUTHORHOUSE, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book. In spite of increasing use of advanced technology, the patient-orientated field of medical science, clinical medicine, has by and large retained the mechanistic-substantial perception of reality inherited from the scientific communities of the eighteenth and nineteenth centuries. In contrast, physics bade farewell to this view more than a century ago and now conceives the world primarily as a dynamic continuum of energy. Biochemists now regard structural (substantially orientated) and dynamic (energetically orientated) aspects of biochemistry as complementary and equally important. As seen from the perspective of the history of ideas, the anachronistic world view of clinical medicine, a view that can be characterised as dogmatic substantialism, places it in an outdated position compared with physics and biochemistry a position from which the existence of biologically relevant energetic phenomena cannot be recognised as such, simply because they are not supposed to exist. During the latest three decades, the epidemic of energy loss, which comprises the diagnostic entities ME/CFS, fibromyalgia, multiple chemical sensitivity, consequences of whiplash injury, and several other conditions, has affected Western societies increasingly and caused significant humanitarian, social, and economical problems. It is no exaggeration to...
