Forgotten Books, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from A Review of the Literature of Reinforced Concrete Previous to 1904 the literature in the English language on reinforced concrete consisted of scattered articles in technical periodicals, and of papers in the transactions of engineering and other allied societies, but during that year the growing need for a comprehensive and systematic treatise was supplied by the publication of three books within a few months of each other. Since that time there has been such a vast amount of literature on the subject that it is difficult for those interested to select the book that best suits their special requirements. Hundreds of requests have been received by the Engineering News Book Department for information as to the best books or regarding the value of some special book or for a comparison of two or more books, and the impossibility of satisfactorily entering into such details in correspondence has led to the preparation of the following list of current works, with brief descriptions, sufficient, however, to give some idea of the scope of each. Any of these books can be supplied by The Engineering News Book Department (220 Broadway, New York) and will be sent prepaid, to any part of the world, on receipt of price, and in every case when the books are in print and available in New York City, they will be shipped the same day that the order is received. The Engineering News Book Department can also supply any other books published, of a technical or general nature, and will be pleased to give information regarding these, on request. (patents Applied for) About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic...
