

## Synthesis, Characterization and Applications of Nanomaterials in the Field of Photocatalysis

By Shamaila Sajjad

GRIN Verlag. Paperback. Book Condition: New. Paperback. 176 pages. Dimensions: 8.3in. x 5.8in. x 0.4in. Doctoral Thesis Dissertation from the year 2011 in the subject Chemistry - Materials Chemistry, grade: -, East China University of Science and Technology (-), language: English, abstract: Considerable effort has been made to design, fabricate, and manipulate nanostructured materials by innovative approaches. The precise control of nanoscale structures will pave the way not only for elucidating unique size/shape dependent physicochemical properties but also for realizing new applications in science and technology. Nanotechnology offers unprecedented opportunities for improving our daily lives and the environment in which we live. This thesis mainly describes recent progress in the design, fabrication, and modification of nanostructured semiconductor materials for environmental applications. The scope of this thesis covers TiO<sub>2</sub>, Bi<sub>2</sub>O<sub>3</sub> and BiOCl materials, focusing particularly on TiO<sub>2</sub>-based nanostructures (e. g. , pure, doped, coupled, mesoporous, hierarchically porous, and ordered mesoporous TiO<sub>2</sub>). Mesoporous titania is of particular interest since this class of materials possesses well-defined porosity and large specific surface areas. For photocatalytic degradation of organics, these desirable properties are anticipated to improve the efficiency. So in the first part of work, I have synthesized the mesoporous titania by using poly ethylene glycol...

### Reviews

*Simply no words to spell out. It can be rally fascinating throug studying period of time. You will not really feel monotony at at any moment of your own time (that's what catalogues are for concerning if you ask me).*

-- **Dr. Isabella Turner**

*It becomes an amazing book which i actually have at any time study. It is actually loaded with wisdom and knowledge You wont sense monotony at at any time of your respective time (that's what catalogues are for regarding should you request me).*

-- **Rosina Schowalter V**
