The Clean Power Revolution is the 1st book ever written that describes a detailed, market-driven plan (i. e. it does not rely on any support from the U. S. government) to convert America from a fossil-fuel-based energy economy to 100 clean power - and save the economy 20 Trillion by 2025. The book describes The Freedom Plan(r), which describes a 10-year, step-by-step plan to implement renewable energy (primarily wind, solar, biomass) to power 100 of the national electric grid AND make enough hydrogen from water to power every car and truck in America. The Freedom Plan will cost 2 Trillion, take 10 years to complete, save the U. S. economy 20 Trillion by 2025, and add 6 Trillion of positive economic impact (including millions of new jobs and billions of dollars of new capital formation). An easy read (technical where it needs to be, but not boring!), this book will educate the reader about wind power and hydrogen while painting a picture of what life can be like in America with a renewable energy economy.
