CRANIOFACIAL FIBROUS DYSPLASIA

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | A review of current management techniques | Craniofacial fibrous dysplasia is an extremely complex condition causing fractures and deformity in children and adolescents. Although relatively standard procedures are effective in adults, children require aggressive and innovative intervention if severe deformity is to be avoided. Bone grafting is seldom indicated. The management of each patient must be individualized. The expectations of the parents must be prospectively managed and the patient and parent must...
