Reviews

It is just one of the best publications. This can be for anyone who states that there was not a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Environmental Protection Agency, 1995 OCLC Number: (OCoLC)33069297 Subject: Health risk assessment -- Forecasting. Excerpt: . . . 3. CONCEPTUAL MODEL FOR FUTURES ANALYSIS The Committee adopted an approach for futures analysis based on the principles developed in Reducing Risk: Setting Priorities and Strategies for Environmental Protection (EPA-SAB-EC-90-021) and the Framework for Ecological Risk Assessment (EPA 630 R-92 001). In Appendix A of Reducing Risk, a matrix approach was utilized to evaluate the intensity of potential ecological effects, the uncertainties of these estimates, the type of ecological responses, and the time scales for ecosystem recovery following removal of the stressors. This approach provides a rational basis for evaluating ecological problems at various spatial scales (e. g. , local, regional, and global) and temporal scales (e. g. , 20 years, 100 years, and 1000 years). Similarly, the Framework for Ecological Risk Assessment, or ecorisk framework, provides a process for analyzing stressors and effects, characterizing risks, and examining consequences of risk management decisions. The premise of the ecorisk approach is that adverse ecological effects occur as a result of exposure to one or more stressors. The conceptual model for futures analysis posed by the Committee (Figure 1) provides a methodology for evaluating future scenarios (developed using assumptions about driving forces) by: 1) identifying the interactions among drivers (ultimate causes of change), stressors, and ecological endpoints; 2) delineating the causes and effects of environmental changes; and 3) exploring ways in which management actions can avoid, influence, or mitigate environmental risks. Comparing a series of scenarios can help to define no regrets actions which...
